

Hardware supported

DPI 611 and DPI 612
Pressure calibrators

DPI 620G and DPI 620G-IS
Multifunction calibrators

Druck PACE series
Pneumatic pressure controllers

**Dry TC 165/650 and
Liquid TC 165/255**
Temperature calibrators

We are a global technology company that designs, develops and manufactures the highest quality, most accurate and reliable customized pressure sensing devices and instruments, software and services. We leverage innovation, continuous improvement and unprecedented quality, to enable our Customers to successfully operate, produce systems, monitor and/or control mission-critical assets in tough environments across the world's most challenging applications.

We delight customers with tailored solutions that address their challenges; embodying our deep domain knowledge of customers' applications, the most innovative and high-performance connected pressure sensing devices, instruments, software and services; produced with the highest standards of safety, quality and delivery.

We are Druck. We provide peace of mind in the toughest environments.

4Sight2 from Druck

Available in multiple languages:
English, German, French, Spanish,
Italian, Dutch, Portuguese, Japanese
Korean and Chinese.

4Sight2 from Druck is your next generation solution for calibration and asset management.

4Sight2 offers an easy-to-use, cost effective and scalable calibration management software that is equally effective for single use or global multi-site operations. This configurable software is designed to empower your organisation to operate simply and securely, connecting your people to instruments, data and enhanced analytics.

Find out more at: bit.ly/4Sight2.

4Sight2 features

4Sight2 from Druck offers a complete solution to calibration and asset management, with features including:

- **Uncertainty calculation** provides additional confidence for calibration data in accordance with industry standards
- **Customisable report feature** allows you to create customised certificates using our brand-new reports engine
- **Traceability report** enables speedy investigation of historical calibrations performed with a reference standard
- **Custom view** allows you to show/hide, sort, re-order and filter tabular data based on your requirements
- **Historical trending** of drift data for interval analysis and predictive decision making.

The traditional calibration process*

The 8 step process highlights the traditional, paper based calibration process. This is highly inefficient, labour intensive and involves manual data storage which is time consuming.

Less efficient

The 8 step process takes over 2 hours to complete, due to the intensive preparation and verification of results required

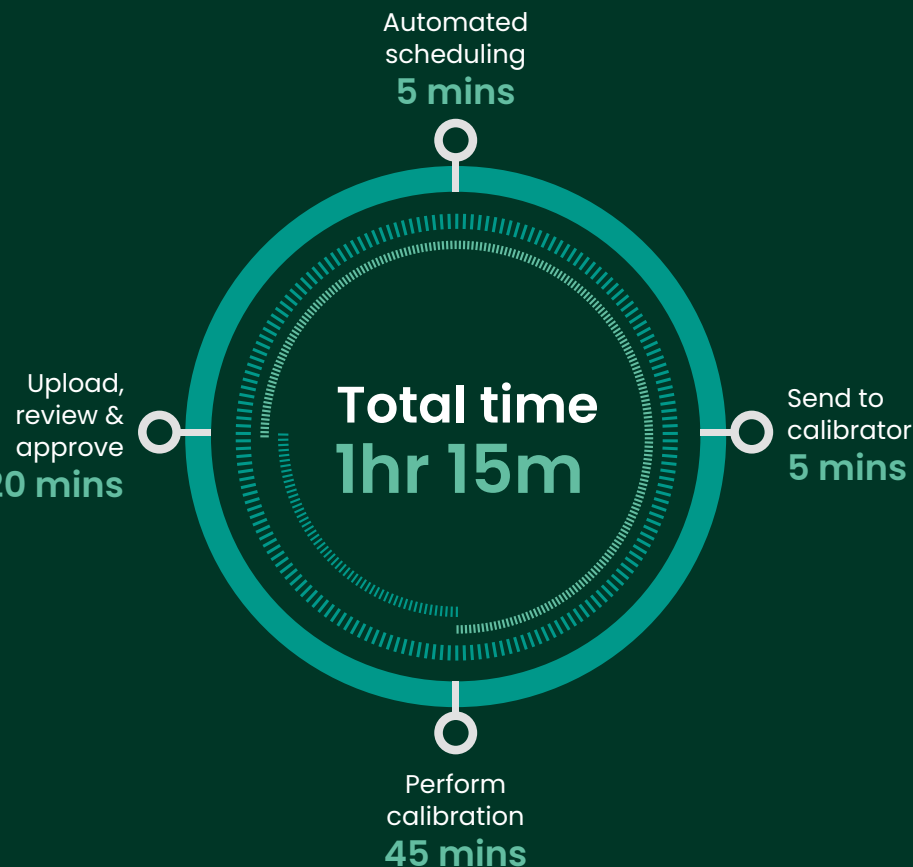

*Based on research conducted at a major pharmaceutical company when comparing calibration timings before and after implementing 4Sight2

The new improved 4 step process

By utilising 4Sight2 from Druck to automate the calibration process and removing the need for manual data entry and storage, your process can be more efficient, saving you time and money.

Up to 40% faster

Druck's 4Sight2 Software can complete a calibration 40% faster than paper-based calibration

4Sight2 packages

4Sight2 from Druck is available in 3 customisable packages: **Light, Standard and Advanced**, offering different levels of accessibility tailored to your needs.

Features	Light	Standard	Advanced
Tags	1,000	2,000	Unlimited
Users	2	3	5
Manual calibration	✓	✓	✓
Portable calibration	✓	✓	✓
Automated pressure calibration (PACE)	–	Either	Both
Automated temperature calibration (Dry/LiquidTC)	–		
Customisable data grids	–	✓	✓
Customisable calibration certificate	✓ (1 template)	✓ (2 templates)	✓ (5 templates)
Customisable policies	–	✓	✓
Trend graph/Drift graph	–	✓	✓
Drift graph in calibration certificate	–	✓	✓
Reports	–	✓	✓
Uncertainty calculation	–	✓	✓
