# You're about to get upgraded

Power stronger performance, increase efficiency and lock down your data with our latest ultrasonic testing machine PC upgrade packages.

The latest software for the **greatest accuracy**

Just like any computer you use, the PC in your ultrasonic testing machine requires replacement after a number of years to ensure ideal performance and reliability. Now is the time to upgrade to the newest PC hardware and software from Digital Solutions, a Baker Hughes business.

We've created a seamless, painless process to implement a complete upgrade of your hardware, operating system and software. Or, you can choose to start with new hardware and the latest operating system and existing application software.

Why wait for improved performance and accuracy? Schedule your upgrade today and enjoy peace of mind knowing your ultrasonic testing machine is performing optimally, so you can:

Ensure system reliability to avoid downtime

**Maximize efficiency, productivity and cost savings**

Strengthen data security with the newest protection measures

Maintain the highest inspection accuracy

Future-proof your operations

From the leaders in **Ultrasonic Testing**

Trusted legacy

We have been delivering peace of mind to the world's infrastructure for more than a hundred years. The legacy of our Krautkrämer / Nutronik brand stretches back to 1946 and spans decades of ultrasonic innovation.

The industry standard

Our ultrasonic testing machine portfolio continually advances industry standards for safety, accuracy and productivity. Simply put, we set the benchmark that others strive to reach.

A reliable partner

Our highly qualified install teams make sure that every part of every ultrasonic testing machine works right. After installation, a Supporting Service Agreement gives you comprehensive, tailored support or hands-on maintenance anytime you need us.

Choose from two ways to **upgrade your system**

Replacement PC Only Package
Get the newest hardware and operating system to work with your existing application software.

Recommended: Complete Upgrade Package
Fully upgrade your ultrasonic testing machine with the newest hardware, operating system and application software customized to your UT instrumentation equipment to maximize performance now and in the future.

Replacement PC Only	Complete Upgrade
Improve productivity with new PC hardware and the latest operating system.	Experience the performance advantages of new PC hardware, Windows 10 and more.
Newest PC hardware for Baker Hughes ultrasonic testing machines	Newest PC hardware for Baker Hughes ultrasonic testing machines
Windows 10 Operating System upgrade	Windows 10 Operating System upgrade
Proven PC hardware that can be installed in any testing machine	Proven PC hardware that can be installed in any testing machine
Existing, known application software package as in current system	Newest ultrasonic application testing software package
Existing interfaces remain untouched	Additional software features available
Existing UT parameter setup can still be used (no new data setup required)	Backward compatibility of application software with different UT electronic releases
	No virtualization required

Enhance your upgrade

Supporting Service Agreements

Peace of mind is always having an expert to call on to make sure you're getting the most out of your UTTM equipment. Ask us about our scalable Supporting Service Agreement (SSA) options to ensure the fastest response times to get you back up and running when there's no downtime to spare.

- Control system performance and increase system availability and life cycle
- Schedule inspections ahead of time and get priority for your desired date
- Plan your service budget upfront for long-term certainty
- Remain compliant according to required standards and regulations

UT Instrument Upgrades

Faster. Smarter. Easier to use. We're improving our robust UTTM instruments to help you achieve maximum performance with an all-new universal electronics platform, including:

Bar & Billet Testing	Strip & Plate Testing
• ROWA B • ROWA Ux • ROB	• BPE • Heavy Plate Tester

Tube & Pipe Testing	Aircraft Parts Inspection
• ROTA • SNUP • ROT • ROWA WT • OPR • ERW • GRP	• NuScan RokStar • NuScan HydraStar • NuScan Tank • NuScan Gantry-Systems

Technical specifications

GEN 6 - Industrial PC

Housing 19" or Tower Version

CPU Intel i5 7500 embedded PC1151

2x Memory DDR4 8GB

2x HDD WD 2TB (as RAID 1 system)

DVD+/ R RW Multi Dual Layer drive

VGA Matrox Millennium M9120; 512MB PCIeX16

4x Network adapter 1000MT
(2 on board, 2 PCI)

Operating system Microsoft Windows 10 IoT LTSB

Standard Software Packages pre-installed: Acronis Backup & Rec., Greenshot / Snagit, BioPDF, NetSupport Manager

Schedule your upgrade today. Contact us to learn which upgrade package is right for your team. You can contact your sales professional, contact our customer care team at **uttm.service@bhge.com** or find contact information specific to your global location at **bakerhughesds.com/contact** to be forwarded directly to the contact sheet.
